I. CRISIS MANAGEMENT PLAN MISSION STATEMENT

Unity College is committed to the health, well-being and safety of its employees, students and visitors on our campus during emerging crises. Unity College seeks to minimize danger to life and safety resulting from the effects of an accident, a natural disaster or civil disturbance. This Crisis Management Plan is intended to have a Unity College Crisis Management Team able and ready to respond when such an emergency condition arises. The Plan further intends that the College will use its best efforts for a timely and effective response to any crisis.

Dr. Stephen Mulkey, President
July 2015

II. PURPOSE

This Crisis Management Plan (CMP) is prepared by Unity College, to provide a structured crisis response plan for use in the event of a crisis or traumatic incident, to ensure that college operations are stabilized and affected employees and students recover in a timely and healthy manner. The Plan describes the responsibilities of the Crisis Management Team and information necessary for them to request additional assistance from the community.

The Plan provides general background information pertinent to the College, its location, potential hazards, emergency response organization, and responsibilities for interaction with the community in an emergency.

III. POLICY

Numerous crisis situations may arise on any college campus. These crisis situations range from natural disasters to civil disturbances. Stress and confusion are normal responses in any crisis; therefore, the timely and efficient implementation of the Crisis Management Plan will assure clear direction and continuity of control for key personnel. The response of the Crisis Management Team should always be consistent.

The Crisis Management Plan (CMP) and Crisis Management Team (CMT) will normally be activated only during an actual or imminent crisis that involves large numbers of people. Routine management of isolated incidents will not require the CMP to be implemented unless the incident poses a significant threat.

The procedures in this policy spell out how the institution and staff will respond to emergencies. For some emergencies, specific checklists have been developed and are included. Emergency steps may include, but not be limited to, warning employees, students, guest and other personnel on campus; communicating with personnel and community responders; conducting an evacuation and accounting for all persons in the facility; managing response activities; activating and operating an emergency operations center; fighting fires; shutting down operations; protecting vital records; and restoring operations.

1. The CMT will contact Public Safety (x232 or 509.7232) for traffic support to direct traffic flow away from the source of danger. Routes of egress will be chosen in relation to the crisis.

2. Those able to leave by automobile or other means should proceed to a designated off-campus Evacuation Assembly Areas listed below:
   a.) Unity College Centre for the Performing Arts
   b.) Field of Dreams
   c.) Half Moon Gardens
   d.) Unity Elementary School
   e.) Mount View School

IX. PROCEDURES FOR SPECIFIC CRISIS

A. FIRE

1. Sound the alarm, call 911, and evacuate the premises following Evacuation Plan. [SECTION VIII / Page 11]

2. Contact Public Safety (x 232 or 509.7232) who will alert the CMT (Crisis Management Team).

B. SEVERE WINTER STORM OR BLIZZARD

A decision to close the college because of inclement weather may occur at times.
If a weather emergency occurs in the early morning hours, a decision to close the campus or delay an opening will be made by 5:30 a.m., by an authorized college official. If a weather emergency occurs later in the day, the determination for an early closure will be made as appropriate.

The announcement of the closure will be done by an authorized college official in the following venues:

- sent to employees and students through the college email network
- announced on the college’s critical alert (weather) phone (207) 509-7207 system, and
- on the following media outlets:
  - WABI - Channel 5 (Bangor Station)
  - WWME - 92 Moose FM

C. **LIGHTNING STRIKE**

If someone has been struck by lightning notify Public Safety immediately (x 232 or 509.7232).

D. **BOMB THREAT (See Appendices, Pages 3 and 4, for additional information)**

1. Sound the alarm, call 911, and evacuate the premises following Evacuation Plan. (SECTION VIII/Page 11)
2. Contact Public Safety (x 232 or 509.7232) who will alert the CMT (Crisis Management Team).
3. Evacuate buildings and proceed to Emergency Assembly Area and account for all employees and students.
4. Following an evacuation, no one should re-enter any buildings until officials declare the area safe.

E. **GENERAL RESPONSE TO NATURAL DISASTERS**

1. Retain all students, staff, and visitors inside the building.
2. Seek shelter in the lowest levels of buildings or an interior hallway, remaining clear of exterior windows and doors.
3. If it is safe to do so, evacuate rooms having large roof spans (gym, etc.) or those that are located where they will receive the full force of the wind.
4. If caught in open country, lie flat in the nearest depression, such as a ravine or ditch.
5. Employees and other personnel traveling to the College should take shelter, if possible, at a safe location. His/her supervisor should be contacted as quickly as possible informing him/her of his/her location.
6. Account for all employees and students.
7. Monitor the am/fm radio for information and warning notices.
8. Notify utility companies of any break or suspected break.
9. Shut off all electrical utilities. When services are restored, check the effects of the storm on the facilities (broken windows, safety hazards, refrigeration, clocks, etc.).
10. Provide status reports on a regular basis to the Director of Facilities & Public Safety.

F. **HAZARDOUS MATERIALS ACCIDENT**

Hazardous materials are substances that are flammable or combustible, explosive, toxic, noxious, corrosive, oxidizable, an irritant, or radioactive. A hazardous materials accident can occur on site (i.e., spill of some corrosive material or broken gas line) or near enough to the campus to be a potential hazard (i.e., highway accident causing a spill of some highly toxic materials or release of some toxic gases into the air from an industrial accident or fire).
Some hazardous materials accidents will be minor and only involve the immediate evacuation of a site and others may be large enough to necessitate relocating all students, staff, and other persons to either a safer location on campus site or to an evacuation area away from the site. The nature, severity, and potential for health injury of the hazardous materials accident will determine the type of response required.

Whatever the severity of the hazardous materials accident, college personnel should not attempt to take it upon themselves to remove a known or possibly hazardous chemical or substance. There are personnel trained and equipped to do so.

1. On-Site Chemical Accidents
   In the case of a chemical accident on campus or if the college wants to have a possible hazardous chemical removed, contact Public Safety (x 232 or 509.7232).

2. Off-Site Chemical Accidents
   It is anticipated that major chemical accidents may occur off site, probably on nearby major streets and highways, as well as nearby industrial areas. Chemical accidents of disaster magnitude would probably be the result of a tank truck, railroad, or industrial accident by the release of large quantities of toxic gases. In these instances the College will probably be contacted directly by the police and/or fire departments. When evacuation of the area is necessary, College personnel will probably be directed to a specific relocation area by the local response agencies involved (fire, police, etc.). These are some actions/considerations to be addressed in the case of a major chemical accident posing a potential hazard to the College:
   a.) As appropriate, contact Public Safety (x 232 or 509.7232).
   b.) Determine the need to remain inside/outside.
   c.) Determine whether students and staff should leave College grounds.
   d.) Maintain safety of employees, students, and visitors in a secure area.
   e.) Render first aid, as necessary.
   f.) Return to site/building after government agency officials (fire department/police/Hazardous Materials Team) have declared area safe.

G. POWER FAILURE
   The response procedures are dependent upon whether we have or do not have advance warning and whether classes are in session or not in session.

1. Power outage with or without advance warning will be communicated from the Director of Facilities & Public Safety to IT, Central Maine Power, and to the President’s Office.
   
   CMP: 800-696-1000 (outages or trouble)
   866-565-3181 (normal hours)

   The President’s Office will notify the campus as appropriate.

2. Announcements of an administrative closing due to power failure with advance notice or without will be on the following radio and television stations:
