B.S. in Environmental Science and Climate Change

Today's scientists must be prepared to assess environmental problems and provide solutions. Through transdisciplinary learning, linking the social, physical, and natural sciences, Unity College environmental science students will be poised for a vibrant career implementing solutions to the world's environmental issues. Learning through the lens of climate change adaptation and mitigation, this program will allow students to step into enriching careers that make a difference.

This degree program prepares you for a career as an Environmental Protection Agency (EPA) inspector, environmental consultant, environmental engineer (with graduate school), civil engineer, or urban or regional planner. In addition to the core scientific studies, this bachelor's degree helps to improve your critical thinking, analytical skills and communication skills which are valuable assets in all industries.
