

EVPC 102

Ecoliteracy for a Sustainable World

Why do I need to take this course?

- It's the foundation for all Unity Distance Education Bachelor's degrees
- You'll learn to submit work and use instructor feedback to improve your performance in future courses
- So you can practice understanding assignment instructions, rubrics, and submitting diverse formats (e.g., discussions, presentations)

What will I learn?

- Research skills using reliable and diverse information sources
- Effective communication in online and digital environments
- Energy flows and cycles in ecosystems, preparing you for future courses in your major

How does it help me?

- Build tools and strategies to thrive in distance learning, starting with your first course
- Gain relevant science and real-world skills applicable to current workplaces
- Learn to navigate Unity's online platforms while developing valuable career-ready abilities

What is an AI-First approach?

Unity is embracing AI from day one. You'll learn to:

- Leverage AI for success: Use AI tools for brainstorming, research, and communication
- Lead in the digital era: Gain practical experience with cutting-edge technologies
- Use AI ethically: Ensure academic integrity while navigating AI applications
